Postal Address: Punjab Co-operative Housing Society, Lahore, 54760

Objectives

I am a motivated and adaptable student currently pursuing Computer Science at UCP. With a strong background in customer service, payment dispute resolution, and team coordination, I bring real-world problem-solving skills into technical environments. I am eager to apply my growing programming knowledge and work ethics in software development, QA, or technical support roles.

EDUCATION

Bachelor (BSCS) **2022- 2026**
Major: Software Management
University of Central Punjab

Intermediate in Pre-Medical **2020-2022**
Superior College Main Campus

Matriculation (Science) **2018-2020**
Divisional Model Public High School

PROFESSIONAL EXPERIENCE

Travel E Smart – Travel Agent **Feb 2025 – Apr 2025**

- Managed travel bookings and customer inquiries
- Coordinated itineraries and provided travel support

Learned & Achieved

- Improved customer communication skills
- Learned travel booking software and coordination tools

University of Central Punjab – Lab Attendant (FOIT) **Oct 2024 – Feb 2025**

- Assisted lab instructors during practical sessions
- Maintained computer lab equipment and software setup

Learned & Achieved

- Hands-on experience with lab management
- Enhanced technical troubleshooting skills

PROJECTS

E-Wallet | University of Central Punjab | Mar 2024 – Jul 2024
Tools: Android Studio (XML/Java)
E-Wallet Application using Android Studio (XML/Java). This project is an E-Wallet mobile application developed using Android Studio with XML for the user interface and Java for backend logic. The app allows users to register, log in securely, add funds, transfer money, view transaction history, and manage their account details. It features clean and responsive UI, intuitive navigation, and real-time balance updates. This project highlights the use of object-oriented programming, Android lifecycle management, and database connectivity (e.g., SQLite or Firebase) in mobile financial solutions.

Banking Database Management System | University of Central Punjab | Dec 2023 – Feb 2024
Tools: SQL/SQLite
Banking Database Management System using SQL/SQLite. This project is designed to manage core banking operations such as creating customer accounts, handling deposits and withdrawals, viewing account details, and generating transaction reports. The system uses structured SQL queries to perform CRUD (Create, Read, Update, Delete) operations on a secure and efficient database.

Library Management System | University of Central Punjab | Dec 2022 – Feb 2023
Tools: C++
This project is a console-based Library Management System developed using C++. It provides essential functionalities for managing a library's operations, such as adding new books, issuing books to users, returning books, deleting records, and viewing the book list. The system uses file handling for data storage, allowing persistent management of books and user records. The project demonstrates the use of object-oriented programming concepts like classes, objects, inheritance, and constructors. It is designed to be simple, user-friendly, and efficient for small-scale library management.

ACEDAMIC MAJOR SUBJECT

- Programming Fundamental
- Object Oriented Programming
- Database Management System
- Mobile Application Development
- Natural Language Processing
- Cloud Computing
- Data Structure & Algorithms

SKILLS

- Python
- XML/Java
- Logical Thinking
- C++

- Dart
- MySQL
- Microsoft Word
- Microsoft Excel
- Microsoft Office

HOBBIES

- Traveling
- Singing
- Movies
- Cycling
